Begründung:

Mit der Eingabe vom 19.12.2022 hat der Cambridge University Caving Club (CUCC) um Erteilung der im Spruch dieses Bescheides angeführten Forschungsbewilligung angesucht.

Seitens der naturschutzfachlichen Amtssachverständigen wurde am 23.01.2023 folgende Stellungnahme abgegeben:

Frau Dr. Rebecca Lawson sucht im Namen des Cambridge University Caving Club, Cathedral Garden Lodge, St James Road, Upper Parliament Street, Liverpool, UK, L1 7 AY um Bewilligung von sechswöchigen Höhlenforschungsarbeiten und im Zuge dessen auch um Bewilligung für die Errichtung eines Zeltlagers auf dem Loser Plateau im Sommer 2023 an.

Das Ziel ist die Erforschung von Höhlen in den Katastergebieten 1623 und 1626 insbesondere die Balkonhöhle, die Heimkommenhöhle und die Fischgesichthöhle, sowie die Suche nach neuen Höhlen durch Oberflächenprospektion. Alle Entdeckungen werden (wie bisher) vollständig vermessen, dokumentiert und im Höhlenkataster eingetragen.

Das Projektgebiet und der geplante Zeltlagerplatz liegen innerhalb des Naturschutzgebietes XVI – „Westteil des Toten Gebirges“ und innerhalb des Europaschutzgebietes Nr. 35 – „Totes Gebirge mit Altausseersee“.

In den letzten Jahren hat der Cambridge University Caving Club Höhlenbefahrungen und Beforschungen durchgeführt, ohne dass es zu Beschwerden gekommen ist. Die entsprechende wissenschaftliche Qualifikation, Fachkundigkeit und Erfahrung in Bezug auf das vorgesehene Forschungsansuchen, aber auch im allgemeinen Verhalten in geschützten Höhen (zum Beispiel schutzspezifischer Höhlenfauna) kann daher aus heutiger Sicht als gegeben vorausgesetzt werden.

Bedingt durch die COVID-19 Pandemie konnten die Expeditionen in den Jahren 2020 und 2021 nicht durchgeführt werden.

Laut Europaschutzgebietsverordnung, Anlage A, zählen nicht touristisch erschlossene Höhlen sowie die kleine Hufeisennase (*Rhinolophus hipposideros*) zu den Schutzgütern des Europaschutzgebietes Nr. 35. Die vorgesehenen Forschungsarbeiten im Sommer 2023 liegen außerhalb des Zeitraums in dem Höhlen von Fledermäusen als Winterquartiere genutzt werden. Die Befahrung der Höhle für Forschungszwecke wurde außerdem in den letzten Jahren ohne Probleme oder dokumentierte Schäden durchgeführt. Eine Beeinträchtigung der Schutzgüter ist daher auszuschließen.

Das Lagern und Biwakieren zählt im Naturschutzgebiet „Westteil des Totes Gebirges“ zu den Verbotstatbeständen. Ausnahmen von den im § 2 genannten Verboten können erfolgen, wenn der Eingriff dem Zweck des Schutzes nicht widerspricht.

Da Schutzgebiete auch der Wissenschaft und Forschung dienen und durch ein fachkundig errichtetes Lager keine nachhaltigen Beeinträchtigungen abzuleiten sind (Landschaftsbild, Naturhaushalt) werden

in diesem Fall gegen die Erteilung einer Bewilligung zur Erforschung der Höhlen und zur Errichtung eines Lagers **keine Einwände** erhoben, wenn die Auflagen 1. – 16. eingehalten werden.

Befund und Gutachten der naturschutzfachlichen Amtssachverständigen wurden dem Antragsteller sowie der Umweltschutzbehörde zur Wahrung des Parteihörs mit hieramtlichen Schreiben vom 25.01.2023 zur Kenntnis gebracht. Gleichzeitig erging das Ersuchen, eine etwaige Stellungnahme binnen 2 Wochen an die Naturschutzbehörde zu erstatten, da ansonsten davon auszugehen sei, dass der Antragsteller dem Ermittlungsergebnis zustimmt. In diesem Fall würde das Ermittlungsergebnis der Entscheidung zu Grunde gelegt. Innerhalb der gesetzten Frist langte keine Äußerung des Antragstellers bei der Naturschutzbehörde ein und war das Verfahren daher fortzusetzen.

Stellungnahme der Umweltschutzbeauftragten für Steiermark, Hofrätin MMag^a. Ute Pöllinger:

„Mit Schreiben vom 25.1.2023 wurden mir Befund und Gutachten der naturkundlichen ASV zum neuerlichen Antrag des Cambridge University Cavin Club, vertreten durch Frau Dr. Rebecca Lawson übermittelt, auf dem Loser Plateau im Sommer 2023 sechswöchige Höhlenforschungsarbeiten durchzuführen und dafür auch ein Zeltlager zu errichten. Das Vorhaben beansprucht das NSG Nr. XVI und das ESG Nr. 35, weshalb eine naturschutzrechtliche Bewilligung erforderlich ist.

Auf Basis des schlüssigen Gutachtens von Frau DI Skacel und der einschlägigen Vorverfahren darf mitgeteilt werden, dass von meiner Seite keine Einwände gegen die Bewilligung bestehen, sofern die vorgeschlagenen Auflagen im Bescheid vorgeschrieben werden.“

Aus der von der naturschutzfachlichen Amtssachverständigen abgegebenen Stellungnahme geht schlüssig hervor, dass durch das gegenständliche Vorhaben bei Erfüllung und Einhaltung der vorgeschriebenen Auflagen weder der Landschaftscharakter noch das Landschaftsbild nachhaltig verunstaltet werden noch die biologische Vielfalt und Eigenart beeinträchtigt wird.

Es war daher die beantragte naturschutzrechtliche Bewilligung zu erteilen.

Die Kostenvorschreibung erfolgte tarifgemäß.
